

21st Century Seminar Series

“Spatial Epidemiology of Health Disparities in LGBT Populations: What Have We Learned So Far and What’s Next?”

Dustin T. Duncan, ScD

Assistant Professor
Department of Population Health
New York University
School of Medicine

The talk with focus on the existing research assessing neighborhood-level determinants HIV infection and related outcomes and behaviors among men who have sex with men (MSM) and transgender women (TW). This talk will also focus on methods and approaches used to define neighborhoods and measure their characteristics, discuss the limitations of current approaches, and explore emerging methods aimed at addressing these limitations.
