Course Title: Cancer Epidemiology
Course Number: EPID 0601
Course Pre- and Co-requisite(s): PHCO 0502 (Minimum Grade of B)
Course Location: New Brunswick/Piscataway Campus*
School of Public Health – Room 3A/3B
Newark Campus*
One River Front Plaza, 10th Floor – Room 1023
Course Date & Time: Thursdays, 3PM-5PM
Spring 2020 | January 20, 2020 – May 11, 2020
Course Instructor: Glenn Grossman, Adjunct Professor
Department of Biostatistics & Epidemiology
SPH Piscataway/New Brunswick
683 Hoes Lane West, Room 211
Email address: glenn.grossman@rutgers.edu
glenngrossman@ymail.com
Phone: (347)744-9288
Office Hours: By Appointment Only
Course Assistant: Not Applicable
Course Website: https://rutgers.instructure.com/courses/178261
Required Smartphone App: Socrative Student – Available (FREE) in the Apple App Store and on Google Play.
Additional/Supplemental Readings/Resources:
- Fundamentals of Cancer Epidemiology, 2nd Edition, Edited by: Philip C. Nasca and Harris Pastides
- Global Epidemiology of Cancer, by Randall E. Harris
- Becoming an Academic Writer: 50 Exercises for Paced, Productive, and Powerful Writing, by Patricia Goodson
Remote Learning Policies
As you know, we are engaged in this course under extraordinary circumstances. Not only are we now conducting the class remotely, but we are all working under the repercussions of the COVID-19 pandemic. The following are class policies for our class sessions with Zoom. Please read carefully; these policies apply to the Spring 2022 semester. All students are expected to adhere to the policies.
General: Log into Zoom using your Rutgers NetID and sign-in with your full first name and last name as listed on the class roster. (If you use a different name than what is listed on the class roster, please email the instructor in advance of the class or send a private Chat message.) Using your full name allows the instructor to know who is in attendance and to quickly sort students into their groups when needed. Users who do not log into Zoom using their Rutgers NetID may have trouble accessing the Zoom classroom.

Video: Please turn on your video when possible. We recognize that this isn’t always easy but this will help to build our class community. Seeing the faces of your classmates more closely duplicates the typical in-person learning experience and may shift your mindset into more focus and attention. Seeing each other can also provide each of us with positive social interactions.

If you’re unable to find an environment without a lot of visual distractions or prefer to not show your living space as a background, feel free to use a virtual background (several virtual background images created by the School of Public Health are available in the Student Connect Canvas page (Links to an external site.)).

To save bandwidth, there may be times during class when the instructor asks students to turn off videos.

Add a photo to your Zoom profile. (Then in times when videos are off, we’ll see photos of everyone rather than an empty box.)

If you have limited internet bandwidth or other issues impacting your video use, please inform the instructor.

Audio: Mute your microphone when you are not talking. This helps eliminate background noise.

Use a headset, if possible. If you own headphones with a microphone, please use them. This improves audio quality.

Be in a quiet place, if possible. Turn off any music, videos, etc. in the background.

Chat: Stay on topic and be respectful. Use the chat window for questions and comments that are relevant to class.

NOTE: Class meetings on Zoom will be recorded and made available for students in the course on Canvas only.

Special Circumstances During COVID-19

The School of Public Health recognizes that students may experience challenges or be negatively impacted due to the COVID-19 pandemic, mental and emotional health toll from systemic racism, altered personal and professional obligations, and other crises existing at the moment in our local, national, and global communities. Students are encouraged to discuss these challenges and circumstances with their instructor, if they feel they may need additional support or temporary accommodations at the beginning or during this course. The course instructor may consider making reasonable temporary adjustments depending on the student’s situation. If additional support is needed, students may reach out to the Office of Student Affairs studentaffairs@sph.rutgers.edu (Links to an external site.) or any of the appropriate referral resources listed on the Student Connect Canvas page (Links to an external site.).
Course Description: This course will introduce cancer epidemiology, highlighting current population statistics (i.e., incidence, mortality, survival) and cancer risk factors (including host and environmental factors). Topics and examples from cancer molecular epidemiology research will also be introduced. Additionally, this course will encourage critical thinking and writing about these concepts. Students will increase their knowledge of the cancer burden (globally and in the United States) and obtain advanced skills for critiquing and interpreting published research in the field of cancer epidemiology, as well as for communicating (i.e., oral, written) scientific information, particularly related to topics in cancer epidemiology.

Selected Concentration Competencies Addressed: Each Concentration identifies competencies for each degree offered. The competencies addressed in this course for the MPH in Epidemiology include:

1. Critique epidemiologic literature, assess its strengths and weaknesses, and determine if conclusion(s) are supported;
2. Formulate a specific hypothesis and determine an appropriate study design and analysis plan;
3. Appropriately analyze and interpret epidemiologic data, including large national and state level datasets; and
4. Communicate and present study findings to professional audiences.

Please visit the Concentration webpages on the School of Public Health’s website at sph.rutgers.edu for additional competencies addressed by this course for other degrees and concentrations.

Course Objectives: By the completion of this course, students will be able to:

a. Describe the U.S. and global burden of cancer and the impacts on public health;
b. Explain global and local patterns of cancer incidence, mortality, and survival;
c. Discuss the major known risk factors for several common human cancers and evaluate trends in the prevalence of important etiologic factors;
d. Discuss current modalities for cancer screening and prevention, and evaluate the effectiveness of various strategies for reducing cancer burden;
e. Identify and discuss controversial topics in cancer epidemiology;
f. Critique study designs applied in the field of cancer epidemiology, as well as some methodological issues involved in molecular cancer epidemiology studies;
g. Describe ongoing cancer research among select faculty at Rutgers School of Public Health and Cancer Institute of New Jersey;
h. Critically evaluate the literature and summarize/synthesize data from the current literature; and
i. Communicate and present a cancer epidemiology topic to a public health audience.

Course Requirements and Grading:

- **Expectations:** Students are expected to attend and be prepared for every class session (by completing the course readings before class), as well as to actively participate during classroom activities and discussions. The course includes: six (6) article summary assignments; online forum discussions; a course exam (midterm); and a flash talk assignment (final project – abstract and brief oral presentation. Students are expected to complete and submit all assignments by the due date and to sit for the midterm exam at the scheduled time. If a student anticipates submitting an assignment late for a serious reason, he/she should contact the Dr. Llanos prior to the scheduled due date to receive permission and determine an agreed upon date for submission. If no arrangement is made, any late assignment will be penalized 5% per day. Similarly, if a student finds that he/she must miss the midterm exam for a serious reason, he/she should contact the instructor prior to the scheduled date of the exam to receive permission to reschedule. Please note, for 3 graduate school credit hours, New Jersey requires 2.5 hours of classroom contact time. At Rutgers SPH, we divide this time into 2 in-class hours plus ½ hour spent doing other class activities (shown as “Online 30” in the course Schedule – beginning on Page 5). It is expected that you devote 2-3 hours studying/preparing for every 1 credit hour spent in class. This equates to approximately 6-9 hours per week for Cancer Epidemiology.

- The final course grade will be determined based on the following activities/assignments, with the respective percentage value assigned to each.
  1. Class participation/Socrative quizzes 5%
  2. Forum posts and online discussions 20%
  3. Article summaries 30%
  4. Course Examination 30%
  5. Flash talk 15%
  Total: 100%

- Overall class attendance, preparation and participation in class discussions and performance on Socrative quizzes (5%)
  - Preparation for class each week will entail reading all assigned readings and completing the assigned online activity before class.
  - See Course Schedule (Pages 5-7) for weekly course topics, online activities, assignments due, and assigned readings, which are provided in more details in the
Assigned Readings List (Pages 8-10). Readings are assigned from the textbook, as well as from the scientific literature, and elsewhere (as appropriate).

- Attendance and in-class participation (during every class session) will contribute a maximum of 5% to the final course grade.

- **Forum posts and online discussions (20%)**
  - Beginning in Week 9, students are required to post at least two (2) topics in Cancer Epidemiology (in the form of a scientific article, media report, or blog post) that highlights a controversial topic relevant to cancer and to discuss this topic on Canvas with classmates.
  - Participation in online discussions of posts from classmates is also required for full credit.

- **Article summaries (30%)**
  - Students will independently select and review six (6) articles from the cancer epidemiology literature based on selected topics (see topics below).
  - Students will review (summarize – e.g., provide overview, critique the strengths and limitations, propose next steps, etc.) and submit a 1—2-page summary (single-spaced) for each topic.
  - Topics for article summaries and due dates are as follows:
    1. Site-specific cancer prevention (e.g., primary, secondary, tertiary prevention) – 02/06/2020
    2. Site-specific risk factor(s) (e.g., association of tobacco smoke exposure with lung cancer) – 02/13/2020
    3. Cancer inequities/disparities topics in the U.S. (e.g., higher rates of thyroid cancer among Blacks in America than other groups) – 02/20/2020
    4. International topics in cancer epidemiology (e.g., site-specific cancer risk associations in a specific country/region) – 02/27/2020
    5. Topics in cancer epidemiology relevant to vulnerable populations or marginalized groups (e.g., HPV-associated cancers among HIV positive individuals) – 03/05/2020
    6. Students’ choice! Pick a topic in cancer epidemiology of your choice, select a primary research article and summarize it. 😊 – 03/26/2020

- **Course examination (30%)**
  - An in-class, midterm exam will be administered on 03/12/2020.
    - This in-class exam will cover material from assigned readings, lecture slides, and in-class discussions (through Week 7), and will be comprised of multiple choice, True-False, matching, and short-answer questions.

- **Flash talk (15%)**
  - Students will select a topic in cancer epidemiology or cancer prevention and control and conduct a comprehensive literature search, which will be the focus of a 3-minute flash talk.
  - Students will summarize the literature they reviewed and prepare one (1) PowerPoint slide that will be shown on the screen when they present their 3-minute flash talk.
  - For this assignment, students must submit the following item (DUE on 04/23/2020):
    - PowerPoint slide (only ONE slide allowed!)
- 1—2-page summary of their topic (single-spaced), with a bibliography of the articles reviewed

- **Grading scale:**
  - 94 – 100  A
  - 90 – <94  A-
  - 87 – <90  B+
  - 84 – <87  B
  - 80 – <84  B-
  - 77 – <80  C+
  - 70 – <77  C
  - <70  F

Assigned Readings List:

LECTURE 1
Textbook: Chapters 1 (pages 1-21) and Chapter 2 (pages 31-54).
Required articles:

LECTURE 2
Textbook: None
Required articles:

LECTURE 3
Textbook: None
Required Readings/Review: To learn more about available Globocan 2018 data and visualization tools for exploring cancer statistics worldwide, please visit: https://gco.iarc.fr/today/home

To learn more about available cancer statistics among the US population, please visit: https://statecancerprofiles.cancer.gov/

LECTURE 4
Textbook: None
Required Readings/Review: To learn more about Cancer Epidemiology Services and the New Jersey State Cancer Registry, please visit: http://www.state.nj.us/health/ces/index.shtml

To learn more about the National Cancer Institute’s Surveillance, Epidemiology and End Results (SEER) Program, respectively, please visit: http://seer.cancer.gov

LECTURE 5
Textbook: Read overview, clinical synopsis, descriptive epidemiology, and genetic and molecular epidemiology sections and review major risk factors for each assigned chapter/site-specific cancer: oral and pharyngeal cancer (Chapter 7, Pages 137-143), esophageal cancer (Chapter 9, Pages 184-191), stomach cancer (Chapter 10, Pages 213-222), colorectal cancer (Chapter 11, Pages 243-261), liver cancer (Chapter 12, Pages 277-294), pancreatic cancer (Chapter 13, Pages 309-320), lung cancer (Chapter 14, Pages 327-342), skin cancer (Chapter 15, Pages 355-370 – focus on melanoma), breast cancer (Chapter 16, Pages 381-406), cervical cancer (Chapter 17, Pages 421-434), endometrial cancer (Chapter 18, Pages 441-452), and ovarian cancer (Chapter 19, Pages 459-471).
Required articles: None
LECTURE 6
Textbook: Read overview, clinical synopsis, descriptive epidemiology, and genetic and molecular epidemiology sections and review major risk factors for each assigned chapter/site-specific cancer: prostate cancer (Chapter 20, Pages 481-506), bladder cancer (Chapter 22, Pages 543-561), kidney cancer (Chapter 23, Pages 571-580), brain cancer (Chapter 24, Pages 587-599), thyroid cancer (Chapter 25, Pages 609-622), Non-Hodgkin lymphoma (Chapter 27, Pages 649-664), and leukemias (Chapter 28, Pages 673-683).

Required articles: None

LECTURE 7
Required Readings/Review: Review all assigned readings and class notes in preparation for the in-class Jeopardy game!

LECTURE 8
Required Readings/Review: Review all assigned readings and class notes in preparation for the in-class course exam!

LECTURE 9

LECTURE 10

LECTURE 11

LECTURE 12

LECTURE 13

LECTURE 14
Textbook: None
Required articles: None

LECTURE 15
Textbook: None
Required articles: None

Learning Management System: Canvas will be used extensively throughout the semester for course syllabus, assignments, announcements, communication and/or other course-related activities. It is the student’s responsibility to familiarize themselves with Canvas and check it regularly. If you have difficulties accessing Canvas, please inform the instructor and Canvas Support (help@canvas.rutgers.edu). Canvas is accessible at canvas.rutgers.edu.

School of Public Health Honor Code: The School of Public Health Honor Code is found in the School Catalog (sph.rutgers.edu/academics/catalog.html). Each student bears a fundamental responsibility for maintaining academic integrity and intellectual honesty in his or her graduate work. For example, all students are expected to observe the generally accepted principles of scholarly work, to submit their own rather than another’s work, to refrain from falsifying data, and to refrain from receiving and/or giving aid on examinations or other assigned work requiring independent effort. In submitting written material, the writer takes full responsibility for the work as a whole and implies that, except as properly noted by use of quotation marks, footnotes, etc., both the ideas and the works used are his or her own. In addition to maintaining personal academic integrity, each student is expected to contribute to the academic integrity of the School community by not facilitating inappropriate use of her/his own work by others and by reporting acts of academic dishonesty by others to an appropriate school authority. It should be clearly understood that plagiarism, cheating, or other forms of academic dishonesty will not be tolerated and can lead to sanctions up to and including separation from the Rutgers School of Public Health.

Students with Disabilities: Rutgers University welcomes students with disabilities into all of the University’s educational programs. In order to receive consideration for reasonable accommodations, a student must apply for Services by first completing a Registration Form with the Rutgers Office of Disability Services (ODS) at ods.rutgers.edu. The student will also be required to participate in an ODS intake interview and provide documentation. If reasonable accommodations are granted, ODS will provide you with a Letter of Accommodations which should be shared with your instructors as early in your courses as possible.

Commitment to Safe Learning Environment: The Rutgers School of Public Health is committed to helping create a safe learning environment for all students and for the School as a whole. Free expression in an academic community is essential to the mission of providing the highest caliber of education possible. The School encourages civil discourse, reasoned thought, sustained discussion, and constructive engagement. Provocative ideas respectfully presented are an expected result. An enlightened academic community, however, connects freedom with responsibility. The School encourages all students to disclose any situations where you may feel unsafe, discriminated against, or harassed. Harassment or discrimination of any kind will be not tolerated and violations may lead to disciplinary actions.
Reporting Discrimination or Harassment: If you experience any form of gender or sex-based discrimination or harassment, including sexual assault, sexual harassment, relationship violence, or stalking, know that help and support are available. You may report such incidents to the RBHS Title IX Office or to the School of Public Health’s Office of Student Affairs. Rutgers University has staff members trained to support survivors in navigating campus life, accessing health and counseling services, providing academic and housing accommodations, and more. If you experience any other form of discrimination or harassment, including racial, ethnic, religious, political, or academic, please report any such incidents to the School’s Office of Student Affairs. The School strongly encourages all students to report any incidents of discrimination or harassment to the School. Please be aware that all Rutgers employees (other than those designated as confidential resources such as advocates, counselors, clergy and healthcare providers as listed in Appendix A to Policy 10.3.12) are required to report information about such discrimination and harassment to the School and potentially the University. For example, if you tell a faculty or staff member about a situation of sexual harassment or sexual violence, or other related misconduct, the faculty or staff member must share that information with the RBHS Title IX Coordinator. If you wish to speak to a confidential employee who does not have this reporting responsibility, you can find a list of resources in Appendix A to University Policy 10.3.12. For more information about your options at Rutgers, please visit Rutgers Violence Prevention and Victim Assistance.

Graduate Student Computer Policy: Students are required to possess a personal laptop, no older than approximately two years, that must meet minimum requirements which may be found online at: sph.rutgers.edu/student-life/computer-support.html

Policy Concerning Use of Recording Devices and Other Electronic Communications Systems: When personally owned communication/recording devices are used by students to record lectures and/or classroom lessons, such use must be authorized by the faculty member or instructor who must give either oral or written permission prior to the start of the semester and identify restrictions, if any, on the use of mobile communications or recording devices.

Policy Concerning Use of Turnitin: Students agree that by taking this course all required papers may be subject to submission for textual similarity review to Turnitin.com (directly or via learning management system, i.e. Canvas) for the detection of plagiarism. All submitted papers will be included as source documents in the Turnitin.com reference database solely for the purpose of detecting plagiarism of such papers. Use of the Turnitin.com service is subject to the Usage Policy posted on the Turnitin.com site. Students who do not agree should contact the course instructor immediately.

Withdrawal/Refund Schedule: Students who stop attending their course(s) without submitting a completed Add/Drop Course form will receive a failing grade. Furthermore, students dropping to zero credits for the semester are considered withdrawn and must submit a completed Leave of Absence form from the School of Public Health’s Office of Student Affairs. The School of Public Health refunds tuition only. Administrative and technology fees are non-refundable. You may find the Withdrawal/Refund Schedule on the School of Public Health website at: sph.rutgers.edu/academics/academic-calendar.html
