Course Title: Grant Writing for Public Health, Behavioral, and Biomedical Research

Course Number: HBSP 0701

Course Pre- and Co-requisite(s): None for doctoral students. For MPH students, HBSP 0600 or EPID 0656 and instructor’s permission required.

Course Location:

Course Date & Time: Fall 2021

This course requires 30 minutes of online learning each week (Online30)

Course Instructor: Paul Duberstein PhD
Professor and Chair
Department of Health Behavior, Society & Policy
Email: paul.duberstein@rutgers.edu
Phone: (732) 956-8074

Office Hours: By appointment only. For appointments, please contact Michelle Ruidiaz-Santiago at ruidiamm@sph.rutgers.edu

Course Website: canvas.rutgers.edu

Required Course Texts: Robertson, J.D., Russell, S.W., & Morrison, D.C. (2019). The grant application writer’s workbook: National Institutes of Health Version. Buellton, CA: Grant Central, LLC. Do not purchase. Assigned chapters have been uploaded in Canvas. In the course schedule below, this book is referred to as “NIH”

Optional Course Text: Morrison, D.C., & Russell, S.W. (2016). The grant application writer’s workbook: Successful Proposals to any Agency. Buellton, CA: Grant Central, LLC. Do not purchase. Recommended chapters have been uploaded in Canvas. In the course schedule below, this book is referred to as “General”

Additional/Supplemental Readings/Resources:

f. Schleider, J.L. Harnessing network science to personalize scalable interventions for adolescent depression. Funded grant application: NIH Director’s Early Independence Award (DP5).

Course Description: This course will offer an introduction to grant-writing, with a focus on the behavioral, social science, and public health portfolio at the National Institutes of Health. Students will learn about the funding opportunities offered by NIH, the grant submission process, and the grant review process. Although the focus is on NIH, students will gain knowledge, practice skills, and cultivate effective professional habits that will facilitate positive grant submission outcomes for funding agencies worldwide.

Selected Concentration Competencies Assessed: The competencies assessed in this course for the PhD (Social and Behavioral Health Sciences) include:

- Demonstrate ability to critically analyze and interpret the scientific literature. This competency will be addressed in all sessions.
- Establish a program of focused research. This competency will be addressed in all sessions.

The competencies assessed in this course for the PhD (Health Systems and Policy) include:

- Demonstrate ability to critically analyze and interpret the scientific literature. This competency will be addressed in all sessions.

Please visit the Concentration webpages on the School of Public Health’s website at sph.rutgers.edu for additional competencies addressed by this course for other degrees and concentrations.

Course Objectives: By the completion of this course, students will be able to:

1. Explain the distinctions between different federal grant mechanisms and funding agencies
2. Describe the criteria used to evaluate grant applications
3. Develop grant-reviewing skills
4. Develop professional skills and habits to avoid common grant-writing mistakes.
5. Write a compelling “Specific Aims” page for a grant application

Course Requirements and Grading:
The following course requirements and assignments will contribute to the overall course grade:

1. Class Participation 10 points
2. Specific Aims Assignment #1 20 points
3. Grant Review Assignment 20 points
Attendance and participation (10%).
Students are expected to attend each class session and participate in all discussions, class activities and assignments. If you are unable to attend class, please notify me in advance.
Students must turn on their cameras for the duration of the class.

Specific Aims Assignment – Draft 1 (20%).
The Specific Aims page is the most important part of a grant application. In this assignment, you will prepare a Specific Aims page (1-page limit) for an F31 or an R03 application. Explain why your chosen topic is significant, and why your proposed approach is sensible given your career stage and/or available resources. Format the documents according to the following NIH recommendations: Fonts must be 11 point or larger without any changes to character density (e.g., changes to letter spacing, tracking, kerning): Arial (NOT Arial Narrow), Georgia, Helvetica, Palatino Linotype. Margins must measure at least 0.5 inch (top, bottom, and sides) on pages formatted to be no larger than 8.5” x 11”.

References should be provided in AMA format (no page limit). This assignment will be graded using four criteria: a) the project’s significance (7 points), b) the project’s approach (8 points); c) writing style (e.g., clarity, logical sequencing, coherence; 3 points) and d) formatting/grammar (eg. AMA style, NIH specifications; 2 points).

Competencies addressed: Demonstrate ability to critically analyze and interpret the scientific literature; Establish a program of focused research

Student Oral Presentations (20%) 
In 15 minutes, a) identify the objectives of your F31/R03 project (Aims), b) describe how you plan to attain the objectives, c) state why you are particularly well-prepared to implement the project, and d) explain how the project will help you meet your career goals. After the presentation, you will respond to questions for 5 minutes. The presentation will be graded based on your description of the project’s significance (5 points), description of points a-b (5 points), description of points c-d (5 points) and your responsiveness to questions (5 points).

Competencies addressed: Demonstrate ability to critically analyze and interpret the scientific literature; Establish a program of focused research.

Mock Grant Review Assignment (20%) 
It is impossible to know how to write a fundable grant without knowing how grants are evaluated and scored. This assignment will help you become acquainted with the NIH scoring system. You will evaluate and score a “mock” grant application. This assignment will be graded based on your description of the mock application’s overall impact (8 points), significance (4 points), innovation (4 points), and approach (4 points).

Competencies addressed: Demonstrate ability to critically analyze and interpret the scientific literature.
Specific Aims Assignment - Final Draft (30%).
After receiving feedback on your first Specific Aims assignment, you will be given an opportunity to revise. The paper will be graded using the following criteria: a) the project’s significance (6 points), approach (6 points), and innovation (6 points); b) responsiveness to my critiques of the first draft (6 points); c) writing style (e.g., clarity, grammar, logical sequencing, coherence) and formatting (eg. References in AMA style, NIH specifications; 3 points).

Competencies addressed: Demonstrate ability to critically analyze and interpret the scientific literature; Establish a program of focused research.

Uploading Written Assignments
Written assignments must be uploaded to Canvas by midnight on the day it is due; late submissions will receive partial credit.

**Learning Management System:** Canvas will be used extensively throughout the semester for course syllabus, assignments, announcements, communication and/or other course-related activities. It is the student’s responsibility to familiarize themselves with Canvas and check it regularly. If you have difficulties accessing Canvas, please inform the instructor and Canvas Support (help@canvas.rutgers.edu). Canvas is accessible at canvas.rutgers.edu.

**School of Public Health Honor Code:** The School of Public Health Honor Code is found in the School Catalog (sph.rutgers.edu/academics/catalog.html). Each student bears a fundamental responsibility for maintaining academic integrity and intellectual honesty in his or her graduate work. For example, all students are expected to observe the generally accepted principles of scholarly work, to submit their own rather than another’s work, to refrain from falsifying data, and to refrain from receiving and/or giving aid on examinations or other assigned work requiring independent effort. In submitting written material, the writer takes full responsibility for the work as a whole and implies that, except as properly noted by use of
quotation marks, footnotes, etc., both the ideas and the works used are his or her own. In addition to maintaining personal academic integrity, each student is expected to contribute to the academic integrity of the School community by not facilitating inappropriate use of her/his own work by others and by reporting acts of academic dishonesty by others to an appropriate school authority. It should be clearly understood that plagiarism, cheating, or other forms of academic dishonesty will not be tolerated and can lead to sanctions up to and including separation from the Rutgers School of Public Health.

Students with Disabilities: Rutgers University welcomes students with disabilities into all of the University's educational programs. In order to receive consideration for reasonable accommodations, a student must Apply for Services by first completing a Registration Form with the Rutgers Office of Disability Services (ODS) at ods.rutgers.edu. The student will also be required to participate in an ODS intake interview and provide documentation. If reasonable accommodations are granted, ODS will provide you with a Letter of Accommodations which should be shared with your instructors as early in your courses as possible.

Graduate Student Computer Policy: Students are required to possess a personal laptop, no older than approximately two years, that must meet minimum requirements which may be found online at: sph.rutgers.edu/student-life/computer-support.html.

Policy Concerning Use of Recording Devices and Other Electronic Communications Systems: When personally owned communication/recording devices are used by students to record lectures and/or classroom lessons, such use must be authorized by the faculty member or instructor who must give either oral or written permission prior to the start of the semester and identify restrictions, if any, on the use of mobile communications or recording devices.

Policy Concerning Use of Turnitin: Students agree that by taking this course all required papers may be subject to submission for textual similarity review to Turnitin.com (directly or via learning management system, i.e. Canvas) for the detection of plagiarism. All submitted papers will be included as source documents in the Turnitin.com reference database solely for the purpose of detecting plagiarism of such papers. Use of the Turnitin.com service is subject to the Usage Policy posted on the Turnitin.com site. Students who do not agree should contact the course instructor immediately.

Withdrawal/Refund Schedule: Students who stop attending their course(s) without submitting a completed Add/Drop Course form will receive a failing grade. Furthermore, students dropping to zero credits for the semester are considered withdrawn and must submit a completed Leave of Absence form from the School of Public Health’s Office of Student Affairs. The School of Public Health refunds tuition only. Administrative and technology fees are non-refundable. You may find the Withdrawal/Refund Schedule on the School of Public Health website at: sph.rutgers.edu/academics/school-calendar.html.
