Cisco WebEx
Sharing Content

How to share Content

There are 2 methods for sharing content on WebEx.

“Share” option on the top left. Or the Share icon ( ) located in the bottom center.
Once “Share” is selected. You will be presented with several of options to sharing your content. All the underlined options will vary depending on what applications you currently have running on your computer. If you are unsure about what to share, sharing your whole screen is the recommended route.
How to pass sharing off to another user.

On your screen you should be able to take ownership of sharing by sharing your own screen. You will be prompted with a notification that if you share your screen, the other person sharing will stop.
