

Flavio Brino

Flavio Brino is a pharmaceutical quality professional with more than 20 years of experience spanning Quality Control, Global Stability, Product Development Quality, and Global Quality System, with focus on GxP Learning. His career combines extensive operational expertise in pharmaceutical quality with leadership in global quality systems, training, and process excellence.

From 2003 to 2015, Flavio held progressively responsible roles in Quality Control at Organon and Bristol Myers Squibb in Brazil, supporting all aspects of laboratory operations, including analytical validation and stability programs. Throughout this period, he remained committed to ensuring patients receive safe, effective products that consistently meet the highest standards of quality and compliance.

In 2015, Flavio relocated to the United States, where he expanded his focus to Global Quality Assurance and Global Quality Systems. In these roles, he led the development and implementation of streamlined, globally harmonized processes supporting manufacturing, distribution, clinical development, and pharmacovigilance, with a particular emphasis on GxP learning and capability development.

Since June 2026, Flavio has been with Daiichi Sankyo, supporting GxP Learning and Documentation for Research & Development and Pharmacovigilance Quality Assurance. He is passionate about strengthening quality culture, enhancing employee capability, and advancing quality systems that ultimately contribute to better outcomes for patients worldwide.
