Safe Schools involves a number of outreach components designed to support Safety and Health Designees and those involved in school-to-careers. Safety and Health Designees refer to the school board appointed school personnel who are charged with the responsibility of implementing a safety and health program for career, technical and vocational programs in their school district or school. The following is a list of the current Safe Schools outreach components:

- Safe Schools: A Health and Safety Check. This is a manual of checklists covering environmental and occupational safety and health regulations for secondary occupational and career orientation programs in New Jersey public schools. The manual was updated twice per year 1993-2008; the manual has now been updated once per year 2009-present.
- Paid trainings (structured learning experience curriculum) as well as free/in-service trainings to teachers on various topics throughout the school year and over the summer;
- Monthly or bi-monthly e-newsletters (during school year only);
- Analysis of injury/illness incident reports received on hard copy forms or the equivalent on-line form (annual reports and, to date, peer-reviewed publications pertaining to data 1999-2010);
- School safety and health plan evaluations and training;
- Assistance with and needs assessments of safety and health issues associated with school-to-careers; and,
- Special task forces (annual to multi-year, e.g., Cosmetology 2010-13) and projects (periodic).

Additional information regarding the New Jersey Safe Schools Program can be found at [www.njsafeschools.org](http://www.njsafeschools.org).
Current New Jersey Safe Schools Program Staff *(alphabetical order, as of April/May, 2018)*

Derek G. Shendell, D.Env, MPH  
Director / Principal Investigator  
(Associate Professor and Doctoral Coordinator, Environmental and Occupational Health)

Maryanne Fakeh, BS
